

Manager's Report

1/17/2017

Sewer Plant: NES is in here every week to pull the pump at the front lift station, it continues to be clogged with rags. So again please make sure you are not throwing anything down the toilets. Please make sure any Guests; Cleaning People; Home Health Care Providers and anyone else that come into your home know not to throw anything down your toilets. Rags and Pantyhose seem to be the biggest culprit.

Lawn Service: West Bay Landscape has had a rough start but last time they were here Dennis and myself walked the property with the onsite supervisor and his supervisor. We discussed many areas that were being reported time after time. They did come up with some suggestions on how to handle these problem areas, so I will give them some time to correct. Please if you still have an issue with the work please stop by the office to discuss and or file your complaint.

Welcome New Employee: Greg Willis started work on Monday January 9th, Rich was happy to some help again. Please be patient while he learns the ropes and hopefully everything will go smoothly.

Road Repairs: As of last week Gator has made all the final repairs to the road and driveways. I think they have done an outstanding job.
