

Manager's Report

2/16/2017

Water Valves: Please remember that the water valves at the street belong to the Club. If you need to have a valve shut off at the street you need to contact the office or if after hours please call a Board Member to assist you. If you break the valve while turning it off, it becomes costly to Club.

Sewer Plant: We still have an issue with foreign objects being flushed down the toilets. We had 3 calls in the last month to clear a blockage. Please keep reminding neighbors who may not attend these meetings that ONLY THE 3 P's should be flushed.

Lake: Aquatic Systems continues to come in every other week to take samples and spray any algae that might be there. They have reported back to me on several occasions that we do have fish in there but most are carp, which will hide in the vegetation in the deeper parts of the water.

Floors: We are behind schedule on the New Flooring installation due to the unexpected removal of the VCT tile. We hope that the Contractor will be able to get the Grand Hall completed by March 3rd. Thank you all for patients during this process and hopefully we can have a fun filled social calendar for the rest of the Season!!

Fining Committee: We have 3 open positions for the fining Committee this year. We need volunteers to step forward to be part of this committee. We will put the names in a hat and draw 3 names randomly at the March Board Meeting. Please let us know in the office if you are willing to be included or if you have questions.
